** ALASKA [non]. 9884.939, March 22 at 1847, S9+10/20 ``Jesus Loves Me`` in English by kidchoir, 1849 Russian ID as KNLS, New Life, and talking about their languages, addresses, www.knls.net, mwv@gmail.com; 18-19 is via MWV MADAGASCAR`s off-frequency transmitter, off just before 1859*. After 1900 its off-frequency switches to 9844.943 for another hour in Russian but first song sounds like English.

Simul on 13670.003 in English as African Pathways Radio, mixing African and American accents, at 1854, S9+10/20 both into UTwente. 13670 still on at 1900 for R. Feda in Arabic. Google translate decides Feda in roman letters is Turkish, meaning sacrifice. If I say it`s Arabic, then translates as silver -- I bet Turkish version is what they mean (Glenn Hauser, OK, WOR)

** AUSTRALIA [and non]. 11900, Mar 26 at 1523, S8/S9 in Burmese with its unique intonation, easily recognizable; yes, it`s RBA sked at 1500-1530; the SSOB except for WWCR 12160 and its dirty spurs (Glenn Hauser, OK, WOR)

** CANADA. 382 MCW kHz, March 21 at 0632 UT, dash and YPL, 500 watt ND beacon at Pickle Lake ON is JBA. It`s a good night when I can hear any Canadian besides YXL on 346. See also USA (Glenn Hauser, OK, WOR)

** CANADA [and non]. 1650 kHz, March 23 at 0712 UT, S Asian music from CINA Mississagua again has QRM from continuous tone of about 320 Hz, probably KSVE El Paso USA. I wonder why in the world they do it, or don`t even realize that`s on the air overnight? (Glenn Hauser, OK, WOR) See also UNIDENTIFIED

** CUBA [and non]. 550, March 26 at 0621 UT, wobbling against 550.0 stations; axually more like wind whining at varying pitches. Local device could infect thus, but others have also noted wobbler on 550. Right now not heard on any other spots as previously: 650, 870, 1040 (Glenn Hauser, OK, WOR)

** CUBA. 6000, March 23 at 0345, RHC not off the air but S9+30/40 and suptorted probably in English between dead airs. Something`s always wrong at RHC. Also with JBA beepery QRM? on the plus side about 6001 at the rate of 108/minute (Glenn Hauser, OK, WOR)

** CUBA [and non]. The DentroCuban Jamming Command was quicker than expected in turning off all? its jammers following the deletion of R. Martí by trumuskp. Last few days & nights, have not heard even any residual off-sked jamming on 5980, 6030, 7355, 7435, 7465, 9565, 11860, 11930, 13820.

As for MW 1180, from Marathon in the Flakeys, it was previously reported gone, but Terry L Krueger in the FL panhandle reported, March 18 at 1744: ``David Crawford, Indian River City, FL confirms Radio Martí 1180 kHz Boot Key (Marathon), FL is still on the air.`` And at 1109 UT March 22, ``It remains on air from the Sister Creek Island 1180 kc/s 100 kW Florida site``. But is it really new/current program content? Earlier, March 16 at 1944: TLK remarked, ``1180 kc/s Boot Key (Marathon FL) and Greenville NC are now prime property for 55+ Margaritaville communities.`` (Glenn Hauser, OK, WOR)

** CUBA [non]. 11860, 11930, 13820, Mar 26 at 1614 and 1810, still no signal from R. Martí as GB transmitters have been closed down. However, OCB got a temporary reprieve; via Mike Barraclough, UK:

``[WOR] Federal employees of Radio Marti will return to their posts March 26th - To: wor@groups.io · Wed, Mar 26 at 2:38 PM

https://www.americateve.com/miami/empleados-federales-radio-marti-regresaran-sus-puestos-este-miercoles-26-marzo-n5410460

AmericaNotificias (translation of Spanish to English)

``Sources from the U.S. Agency for Global Media and Congress have confirmed to América TeVé that, as of this Wednesday, March 26, the federal employees of Radio Martí will return to their jobs. According to the information provided, Radio Martí's transmissions to Cuba, as well as its audiovisual services and the updating of its website, will be restored progressively. This return marks a key step in the reactivation of the station, which has been a key source of information for Cubans, offering free information, news and analysis on the reality inside and outside the island``

``Federal employees of R Martí`` does not necessarily include the operational staff of GB. Does not mean GB can turn SW right back on at short notice, maybe never. Producing programming but only on web at first? On Mar 26, Alan Roe says ``The Radio Martí Facebook page was re-activated today with a new post at 1352 UTC at https://www.facebook.com/martinoticias saying: "¡Buenos Días Cuba!" Alan Roe, Teddington, UK``

Via Kai Ludwig, more about the RTV Martí situation: https://en.cibercuba.com/noticias/2025-03-26-u1-e207888-s27061-nid299638-empleados-radio-marti-podran-retornar-sus-puestos

But from HFCC, here is the A25 sked planned with usual slight frequency changes, effective March 30, all 250 kW, with azimuths; some frequencies are split into different adjacent segments, retained here in case significant:

```
 6030 00-12 205
 7335 00-10 183
 7365 00-03 184
 7435 03-10 183
 7335 10-14 184
 9805 10-13 183
 7365 12-14 205
13605 13-21 184 [ex-13820]
11860 14-22 183
11930 14-20 172
11930 20-21 172
11930 21-24 184
 9565 21-24 184
 7335 22-24 205
```

And how about 1180 kHz Marathon FL? (Glenn Hauser, OK, WOR)

** EAST TURKISTAN [and non]. 9535 // stronger 9730, March 25 at 1935, Chinese music fill during scheduled `Portuguese` hour, via Baoji and Kashgar sites per EiBi, and 9730 with an understation in French, which would be Vietnam, all into UTwente (Glenn Hauser, OK, WOR)

** ECUADOR [and non]. 6050, March 21 at 0647, hymn at S8/S9, too strong for ELWA and too Spanishy. The coreligionists at ELWA and HCJB long had a nice sharing relationship, HCJB never on much past 0500 and then only on weekends, and ELWA never on until a few minutes before 0600. HCJB had already been reported running much later, but can`t find it now; rather this a bit later also March 21 from Wolfgang Büschel:

``6049.993 EQA Surprised, surprised - cross checked Spanish signal on TWR Bonaire KIWI_net signal, also at Brasília and São Paulo KIWIs. It was 100% extended time schedule ?, Voz_Andes Media Quito from Pico Pichincha txion site. S=4-5 in Bavaria-GER, at 0710 UT. Schedule

published is 21 to 05 UT and 0920-1400 UT.``

Of course, in target areas, there may not be too much of a problem with HCJB after sunrise into west Africa, nor ELWA into S America. Per gaisma.com Monrovia sunrise varies little during the year between 0630 & 0700 UT, currently 0647. At longitude 10.8 west, it really ought to be in UT-1 zone instead of UT, the meridianal boundary being 7.5 west. They are on yearound DST and don`t know it, just like Enid (Glenn Hauser, OK, WOR)

** ECUADOR [and non]. 6050, March 22 at 0546, HCJB still on late again with Spanish song, S9/+5 direct. I make a point of listening again from 0556 to detect whether it clash with ELWA LIBERIA. Can`t make out two modulations yet, but off-tuning with BFO can hear a beat by two carriers a few Hz apart. By 0600 there does seem to be modmix. 0601 HCJB ID with music in background, so that`s ELWA? And into Bible reading in Spanish, or at least something citing chapter and verse.

So they are colliding at 0600; however, there has long been an overlap in the evening / afternoon, both on 6050 between 2100 and 2232 per EiBi. Some ELWA signal might be getting into Ecuador toward the end of that (Glenn Hauser, OK, WOR)

** ECUADOR. 6050, Sun Mar 23 at 0706, HCJB S7/S8 JBA in Spanish: I suppose they are now running all-night? S/on had been at 0923 per EiBi, first sesquihour+ in Quechua (Glenn Hauser, OK, WOR)

** ETHIOPIA. 6030, March 23 at 0349, JBA carrier, presumably R. Oromiya, which per EiBi starts at 0253. In the total absence of Cuban jamming, OCB, and CFVP, now a clear shot at it withOUT requiring a local remote (Glenn Hauser, OK, WOR)

** FRANCE. 21705-21710-21715, Mar 24 at 1453, weak DRM noise is the OSOB during degraded propagation. Yes, is on this sked: https://www.drmrx.org/drm-broadcasts-shortwave-by-frequency/ ``21710 TDF (France) 1500-1600 Irregular French Issoudun, France 100 263°Irregular DRM tests. Details unconfirmed.`` - Not in HFCC for B24, however, HFCC for A25 shows 0500-1700, 150 kW at 110 degrees (Glenn Hauser, OK, WOR)

** ITALY [and non]. 10000, March 25 at 1945 UT, bit of music, `Dance of the Hours` -- get it? A.k.a. ``Hello Mudda, Hello Fadda``, and time pips, announcements in Italian from the ``amateur`` timesignal station calling itself Italcable, which was really the name of the point-to-point SW service years ago. Same music bit in following minutes. Also surprised by some Morse code, starting WWV? Guess what, WRTH does not include Italy in the STFT sexion on page 797. I suspect this qualify as a pirate, seldom reported as such. Heard via UTwente. Occasionally double-pips, so some other station is out of synch. 1959 QRM code ID from BPM China. 2000 full ID and contact info in Italian. EiBi shows location as Andrate 45N31-07E53 -- which is in Torino (Glenn Hauser, OK, WOR)

** ITALY. Roberto Pavanello replies to my Italcable report on 10000 kHz: Sent: Tuesday, March 25, 2025 at 09:41:02 PM UTC
Subject: [playdx2019] Amici Italcable
https://dariotion.wordpress.com/tag/amici-di-italcable/

This claims it does have some kind of authorization and runs 90 watts:

``Radio & Tech… amici di italcable
La giornata delle stranezze (3/3) 17 gennaio 2016 dariotion

La terza cosa, probabilmente la più enigmatica di oggi, è una

trasmissione tonale (il suono, non il passo) sui 10.000 KHz.

Da una rapida ricerca, il segnale pare essere attribuito a una stazione del Viareggino, che trasmette una sorta di codifica oraria.

La stazione – amatoriale, con 90W di potenza – appartiene alla associazione “Amici di Italcable”, che ha anche uno (scarno) sito Web ed è presieduta dal sig. Marco Volpe.

Non ci sono grandi informazioni sul sito, né per quanto concerne l’associazione ne relativamente ai tre progetti citati nella home page (segnale orario sui 10 MHz, sui 15 MHz e generica rete di sensori open source).

`9995 to 10005 kHz: This is set aside for standard time and frequency stations, like WWV and WWVH on 10000 kHz.`

E’ strano che una stazione amatoriale trasmetta su queste frequenze (sono riservate nel band plan HF per trasmissioni orarie non amatoriali), ma sul sito è citata una autorizzazione del Ministero dello Sviluppo Economico (pur senza dettagli sulla stessa).

Ho fatto una ricerca – senza pretesa di essere esaustiva – sui registri del Ministero, ma non sono riuscito a risalire a ulteriori informazioni.

Nel sito c’è anche un’indirizzo email: ora provo a scrivere e a chiedere qualche info.

Stay tuned…

P.S. ho trovato un richiamo sul sito del CISAR, che fornisce ulteriori dettagli sulla Associazione; in particolare:

Nell’estate del 2012 nasce in via Del Borgo 6 a Viareggio (Lucca) l’Associazione Amici di ItalCalble {sic}; ad essa viene rilasciata la licenza ministeriale n. 354616/LOR per trasmettere su 10 MHz il segnale orario italiano, quello generato a Torino dall’INRIM – Istituto Nazionale di Ricerca Metrologica. Viene utilizzato un trasmettitore Plessey ed un’ntenna {sic} Dipolo 1/2 onda dalle coordinate JN53DV con 90 watt di potenza.``

Maybe I know too much Italian, but it seems to me that most Anglophones could figure out most of the words. That blog has a lot of interesting stuff, a little in English and none recently. I assume it was by some Dario other than Monferini, but could not find any full name. Like so many bloggers they don`t give themselves any credit by name (via Glenn Hauser, WOR)

** KOREA NORTH. 9424.998-, March 25 at 1919, S9+5/15 into UTwente, VOK reciting its times and frequencies in English; trouble is, Aoki & EiBi show this hour is supposed to be in German! Per WRTH, English at 19-20 is on 9875, 11635, 11910 and 7210 so I check those out during music after 1923, and the first three sound the same, 7210 too poor, as is 6170, the other `German` frequency. Of course, all their music sounds the same, but wires are crossed somewhere. At 1931, all except 6170 are perceptibly in English talk (Glenn Hauser, OK, WOR)

** KOREA SOUTH [non]. 11880, March 22 at 0109, trying to determine what site has necessarily replaced Grimesland for KBS World Radio hour in Spanish, which is still on air as if nothing had happened. Running TDOA via KiwiSDRs, keep getting error messages, but one ``successful`` fix using Spain, Brasil and Florida at 0113 puts it at 25.80 N, -32.20 W, i.e. in the Atlantic way off W Africa beyond Canarias, yeah, right.

As I listen to it via some other remote, they are talking about 11880! Lamenting what has happened to VOA and Martí, but now they say their 11880 is via WOOFFERTON UK! Anyway I then try another trio, northern Sweden, Sa`udi Arabia, and Athens, Georgia -- they fix it at 23.40 N, -1.00 west - which is in SW Algeria. Yeah, right; at least the longitude is close to WOF (Glenn Hauser, OK, WOR)
see also VATICAN [non non]

** MADAGASCAR. see ALASKA [non]

** MEXICO. 660, March 23 at 0319, ``ABC Deportes, 660 AM y 92.1 FM; sabemos cómo se juega`` -- so it`s XEFZ at the Mountain King again, dominating from south with K index at 4, preceded by classic rock in English, i.e. music, not sports! and followed by ``Can`t take my eyes off of you`` (Glenn Hauser, OK, WOR)

** MEXICO [and non]. 800, March 25 at 0647 UT, heavy distortion QRMing KQCV OKC gospel huxter, previously traced to XEERG, NL. Usually audible at night, but worse than usual now (Glenn Hauser, OK, WOR)

** MEXICO. 1549.82, Mar 24 at 0651, still detectable off-frequency carrier hetting 1550.0 stations, presumed XEREL Morelia (Glenn Hauser, OK, WOR)

** MEXICO. 1549.82, March 25 at 0626, JBA carrier still perceived hetting 1550 stations, presumably from XEREL Morelia, Michoacán (Glenn Hauser, OK, WOR)

** MEXICO. 6185-, March 22 at 0547, for the record, still no signal from XEPPM, nor have I ever heard any trace since first noticed absent March 12; nor did they ever reply to my inquiry on contact form. Do any of our Mexican readers/members have any info about this? ¿Quién sabe, qué pasa? (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6850 AM, March 23 at 0350 UT, pirate music with heavy beat of 132/minute, dance/trance?, S9+10/20, the only pirate on band. Per these, it`s Liquid Radio:
https://www.hfunderground.com/board/index.php/topic,142591.0.html
(Glenn Hauser, OK, WOR)

** NORTH AMERICA. 7475 AM, March 23 at 0355, S9/+10 the thintonations of Josiah on Station YHWH but no match for the noise level (Glenn Hauser, OK, WOR)

** OKLAHOMA. 1670, Mar 24 circa 2030 UT, Virtual DJ Radio webcast relay via low-power, Part 15? transmitter somewhere in Enid, peaking at junxion of US81 and US412, and audible whenever I`m in the area, or even downtown on caradio. Doubtful it could be DXed at night, but it would be challenging to try to pull it in as far away as possible on daytime groundwave (Glenn Hauser, Enid, WOR)

** OKLAHOMA. 95.1, Mar 24 at 2030 UT, dead air in $tereo still from LP transmitter in downtown Enid, originally for the `Tree of Light` sponsored by OG&E = the electric company, already two sesquimonths after Xmas! Must be on 24/7 but no music heard lately, altho I only check it for a minute every few days. As I pointed out to the CP holder of KOKJ-LP, this will be an obstacle if he ever gets his 95.1 on the air (Glenn Hauser, OK, WOR)

** OKLAHOMA. 105.5, March 20 at 1856 UT, K288FX Enid translator of K-Love KYLV OKC 88.9 is finally back on air; had been off since at least Feb 14; ditto 91.1 KKRD, Air1. Both are on Broadway Tower, downtown. FCC info via Mike Bugaj, WTFDA had K288FX back on air as of March 19 but never reported KKRD off or on! (Glenn Hauser, Enid, WOR)

** SAUDI ARABIA. 11934.8925v, March 22 at 1844, strident Arabic talk from Rep. of Yemen Radio, VG S9+20/30 into UTwente without buzz (Glenn Hauser, OK, WOR)

** SPAIN. 9690 > 12030 > 17715 >>> JBA 17755, Fri Mar 21 at 2300, token English from SNR, 75% VG into Georgia SDR. Feature topic to be about amateur theatre performing `Midsummer Night`s Dream`; but I`m mainly escuching Turkey as these two insist on simultaneity (Glenn Hauser, OK, WOR)

** SPAIN. 9690, Mon Mar 24 at 2300, token English from SNR, VG S9+20/30 into Maryland SDR, starts with A25 sked from March 30 but generalized only, no language details, not even English. Listeners have to KNOW that it will likely be an hour earlier than now, at 2200 UT and on M/W/F only. Version of same new sked via AER:
``Esquema de emisiones para A-25 de Radio Exterior de España, mayoritariamente en español:
0000-0200 17715 AM-S; 15500 AM-N (M a S)
1400-2300 15390 AF-O, ATL-S; 15520 OR-M, INDICO; 17715 AM-S; 15500 AM-N (S y D)
1500-2300 15390 AF-O, ATL-S; 15520 OR-M, INDICO (L a V)
1800-2400 17715 AM-S; 15500 AM-N (L a V)``
Note: will be on three 15 MHz channels within 130 kHz of each other, not much frequency diversity! No more 17855 for NAm in A-seasons. OR-M means East Middle; AF-O must mean Africa West, altho East would also be -O +riental. Indico means Indian as in Ocean. Should we call it `Indican Ocean`??

2302 finally news; 2307 contact info; 2308 feature about non-binary-gender issue, interview with Barbara Whitman of University of Illinois at Chicago (Glenn Hauser, OK, WOR)

** SPAIN. 9690, Wed Mar 26 t 2300, token English from SNR, VG into Maryland SDR and also audible on the other 3, 12030, 17715 and 17755, opens by reciting A25 schedule without any language details, not even English; preview topic to be book fair in Madrid, Comicon? 2303 into news leading with EU citizens should prepare for the worst with 32 hours of survival supplies (Glenn Hauser, OK, WOR)

** TURKEY. 5960.003, March 21 at 2301, VOT English S9+20/30 into Georgia SDR, after sign-on, the News --- I mean, Olds. Leads with Sa`udi meetings about Ukraine; UN refugee funding cuts; victims in Macedonian nightclub fire treated in Istanbul; air pollution kills 7 megapeople globally yearly; 2307 sports.

NOTHING ABOUT THE MAJOR NEWS FROM TURKEY the last few days: search on Istanbul Demonstration Today for real news, about the detention of Recep`s main opponent, the mayor of the city! So much for getting news from the ``source``, no free press there. I wonder if TRT World TV also ignored it? Richard Langley had been monitoring VOT every day from Wednesday and VOT had nothing to say about it. Someone should complain to `Letterbox` about that and hear how they handle it, justify it, or if they continue to ignore it. 2308 already, multi-lingual ID filler reel; 2310 music; 2315 exploring Istanbul [unless you are the mayor or his supporters] - did he call it a Paradise?? Hard to catch every word due to accents, rhumble on the bigsig. 2325 Turkish Foreign Policy. 2332 ``with-you-every-hour`` promo, music. 2337 ``always-by-your-side`` promo, music. 2343 ``WYEH`` again already. 2344 `Did You Know That?`, always presented by Efsun the axentuated, as I tune out - too much strain to try to understand her. 2349 ``WYEH`` promo again, already. They`re really overdoing these crutches! 2351 s/off recites full English sked for B24, first time they have done that in ages, now that it will last only one more week. 2353 IS to 2354.5* not uncovering Chinese as occurs at UTwente,

but maybe a trace of it (Glenn Hauser, OK, WOR)

Richard Langley, NB, also observes: ``And last night (21/22 March)? Still crickets for domestic Turkish political news. News items covered: upcoming Ukrainian/Russian war ceasefire talks in Saudi Arabia, Iran-U.S. relations, U.S. aid cutbacks for refugees, injured from North Macedonia nightclub fire, air pollution, sports. I guess the Voice of Turkey (o.k. Türkiye) only wants to highlight the problems of others and not their own. Radio Romania International does a much better job of relating events in Romania even if not 100% favourable to the government there. We just can't rely on the Voice of Turkey to be objective in relating current Turkish events. P.S. Have you tried Turkish Popkek? The banana ones are particularly good`` (via Glenn Hauser, WOR)

** TURKEY [non]. 5960, March 22 at 2305, no VOT signal into UTwente, and at 2327 occupied only by the ChiCom. 9610, possible accidental alternate not on air either, just ChiCom Mongolian. At 0440 UT March 23, the final English repeat of VOT totally missing too at UTwente from 6125, 7285. Something`s very erroneous at Emirler: or maybe they are too ashamed of censoring any news about Recep`s opponent to even go on the air?
Via Zacharias Liangas, More about him here:
https://en.wikipedia.org/wiki/Ekrem_%C4%B0mamo%C4%9Flu
In light of all this, should I quit so much monitoring of VOT? Better at 0400 UT Sundays:

Despite the segment name, `Gaza Corner`, this week on `Tangents` from KALW San Francisco, the subject is Turkey. Audible for a week via here:
https://player.streamguys.com/kalw/sgplayer3/player.php?s=8

Run the 3-hour archive ahead to 2:24:10 for this segment, also references these sources:
https://www.foreignaffairs.com/turkey/turkey-now-dictatorship
Turkey Is Now a Dictatorship --
Why Erdoğan May Come to Regret Embracing Full Autocracy
(by Gonul Tol, March 21, 2025)

https://www.al-monitor.com/originals/2025/03/erdogans-enduring-grip-over-turkey-assured-imamoglus-arrest
Analysis: Erdoğan's enduring grip over Turkey assured with Imamoglu's arrest --
The arrest of Istanbul's opposition mayor, Ekrem Imamoglu, on terror and corruption charges cements President Recep Tayyip Erdoğan's dominance, sidelining his strongest rival and tightening his grip on Turkey's political landscape
(by Amberin Zaman, Mar 19, 2025)

Dore Stein`s entire show is a good listen every week, mostly music; `Tangents` airs live UT Sundays 0400-0700 on 91.7 in SF, and
https://www.kalw.org/
(Glenn Hauser, OK, WOR)

** TURKEY [and non]. 5960.003+, Sun Mar 23 at 2258, no signal from VOT into UTwente, going to be another bust? Something`s always erroneous at Emirler. But 2301 recheck, now it is on at S8+30/45 starting olds with wildfires in South Korea; recheck 2322, about Lebanon`s PM visiting Turkey. Now there is 6CI and hum; soon outro as `Pulse of Turkey`s Foreign Policy`. 2324 `Letterbox` theme starting, same YL hostess as usual, starts with a comment about an important matter - Recep becoming even more of a dictator? Of course not! About VOA being abolished as of 31 March. IHHO, SW radio is a brilliant way to communicate, endures where other media fail.

Then calls listeners, almost? all of whom are after QSLs: 1) Francis Multen?, Ireland, heard it in French. 2) Roman Ritnick?, Ukraine. 3) Mr Alexander, Sweden. 2331, music break. 4) Mr Mei? Lin?, Sichuan, China. 5) Aman – Bahin?, India, with SWL club since 1990, listener since 1985. 6) Mr Aisohat?, Argentina. 7) Hidei? Miyaki, Hiroshina, Japan, heard French service; Feb holidays in Turkey? Valentine`s Day 2/14, but not official. 8) last: Mr. Zhen –?–, China. 2340 reminds us that new frequencies start 30/3, no details. 2344 playing song request for someone`s significant other – on staff? 2347 L`box theme, outro. 2348 other music. 2353 s/off as if 1330 on 13635, something`s awry at Ankara. 2354 IS a few times, off somewhat before 2356* uncovering East Turkistan, std condemnation, own anthem at 2400 (Glenn Hauser, OK, WOR)

** TURKEY [and non]. 5960.003+, March 24 at 2300, VOT English not off the air, VG S9+30/40 into UTwente. In AM Synch mode it first read out 5959.993–, with a subaudible het, but switching to plain AM and back to synch, now it reads out properly 10 Hz higher, why? No time to listen today until 2356 recheck when it`s already off, replaced by pop music from China, maybe even in English. This one closer to 5960.000 (Glenn Hauser, OK, WOR)

** TURKEY. 5960.003–, March 25 at 2256, big open carrier into UTwente, cut off at 2256.6*, back on *2257.4 and off* again, never heard IS, but *2300.3 carrier on again at S9+40, and shortly sign on as if it`s 1330 on 13635; awry at Ankara; no further monitoring today. I hope to avoid VOT as much as possible except for `Letterbox` on Sundays, chex of offness or onness (Glenn Hauser, OK, WOR)

** TURKEY. 5960 & 9610, March 26 at 2258, no signals from VOT into UTwente, with 9610 occupied as usual by Mongolian from China, and later at 2320, 5960 occupied by nothing but Chinese from East Turkistan, std denunciation. Something`s always erroneous at Emirler (Glenn Hauser, OK, WOR)

** U S A. 359 MCW kHz, March 21 at 0628 UT, ND beacon GGF, 25 watts, Grant NE;
365 MCW kHz, March 21 at 0639, ND beacon AA, 100 watts at Fargo Harwood `Kenie` ND, site in MN.
Several other regulars audible, but these are the more unusual ones. I have better luck above 300 kHz than below, maybe slightly lower noise level. See also CANADA (Glenn Hauser, OK, WOR)

** U S A [and non]. USAGM -- what`s shut and what`s not: Sources say USAGM have shut down essentially everything for Africa. So the only things left (which apparently are statutorily required) are Martí, Farsi to Iran, Mandarin to China, and maybe service to Afghanistan. All other services to Africa and to the Far East are gone. They also have shut down all the feeds to local FM stations in Africa and elsewhere.

Via Ron Trotto, an update on the situation:

Judge freezes Trump plan to dismantle Radio Free Europe/Radio Liberty
March 26, 202511:22 AM ET David Folkenflik

A federal judge has temporarily barred the U.S. Agency for Global Media and Kari Lake, President Trump's senior adviser at the agency, from moving ahead with plans to cut off all federal funds to Radio Free Europe/Radio Liberty.

The international network is in court in Washington, D.C., seeking a permanent reversal of Lake's orders to kill all funding for it and to wind down all operations, despite a congressional appropriation of $142 million for the network in the current fiscal year...

0030 UT Wednesday SW Radio, Germany 3975;
2030 UT Wednesday SW Radio, Germany 3975;
2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1730 UT Thursday SW Radio, Germany 3975 & 6160.

Financial support appreciated for our non-commercial public service program: thanks for a generous contribution marking Vernal Equinox, from Gerald T. Pollard, Raleigh NC, by check on a US bank to Glenn Hauser, P O Box 1684, Enid OK 73702, and says, ``Many thanks for your unique service to the world.``

One may also contribute not necessarily in US funds via PayPal to: woradio at yahoo.com (Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2287 monitoring: confirmed first SWBC, Friday March 21 at 1300 on WRMI 15770, S8/S9 direct.

From Ron Norton, IRRS/NEXUS/IBA: ``Dear Glenn, I hope this message finds you well. We would like to inform you that your program World of Radio is now being aired according to a revised schedule, effective immediately. The new broadcast times are as follows (all times in CEST):
Friday at 22:30 – AM/MW 1323 kHz + Streaming
Sunday at 01:30 – Streaming only
Sunday at 21:00 – AM/MW 1323 kHz + Streaming
Tuesday at 22:00 – AM/MW 1323 kHz + Streaming
Thank you for your continued collaboration. Best regards, Ron``

Central European Summer Time UT+2 does not start until March 30, so there should be one more week of UT+1, no change, i.e. in UT: Fri 2130, Sun 0030, Sun 2000, Tue 2100. Thence: Fri 2030, Sat 2330, Sun 1900, Tue 2000. Except Mar 28 & 29 not yet DST. Anyhow.

Also confirmed Friday March 21 after 2030 on WRMI webcast only; while 9955 already on at 2050 with IS and ID loop.

Also confirmed Friday March 21 at 2130 on IRRS SW via AM Italia, 1322.997+. S9+5 with fades to S9 into UTwente. Next:

2200 UT Friday WRMI 9955 to SSE [also web-, phonecast; jammed?];
2330 UT Friday SW Radio, Germany 3975;
0300 UT Saturday WTWW 5085 [irregular];
0930 UT Saturday WRMI 9455 to WNW [has been off air; or 7730];
1530 UT Saturday SW Radio, Germany 6160;
1830 UT Saturday SW Radio, Germany 3975;
1930vUT Saturday WA0RCR 1860-AM [1900/2100];
2300 UT Saturday WTWW 9475 [suspended];
0230vUT Sunday WA0RCR 1860-AM [nominal 0315; as late as 0400];
1030 UT Sunday WRMI 9955 to SSE;
2000 UT Sunday IRRS 1323-Italy;
2230 UT Sunday SW Radio, Germany 3975;
2330 UT Sunday WRMI 7570 to NW & 7780 to SW;
0030 UT Monday WRMI 7780 to SW;
0930 UT Monday SW Radio, Germany 6160;
2030 UT Monday SW Radio, Germany 3975;
0330 UT Tuesday WRMI 7780 to SW;

1400 UT Tuesday WRMI 9955 to SSE [also web-, phonecast; jammed?];
2100 UT Tuesday IRRS 1323-Italy;
2330 UT Tuesday WRMI 9395 to NNW;
0030 UT Wednesday SW Radio, Germany 3975;
2030 UT Wednesday SW Radio, Germany 3975;
2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1730 UT Thursday SW Radio, Germany 3975 & 6160.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2287 monitoring: not confirmed UT Sat Mar 22 at 0300 on 5085, as WTWW has been off the air for a few days and still is. George tells me he is getting very frustrated by continually having to fix/repair something in that transmitter, leaving him no time for sales or other activities. However a new person is moving to live-in at the site, relieving him of some tasks.

Confirmed Saturday March 22 at 1530 on SW Radio, Germany, 6160.001, S8/9+10 into UTwente. ACI from weaker 6165 not a problem, nor its RTTY warble.

Also confirmed Saturday March 22 at 1700 on WRN North America stream.

Also confirmed Saturday March 22 at 1838 the 1830 on SW Radio, Germany, 3975.003-, S9/+10 into UTwente. Next:

1930vUT Saturday WA0RCR 1860-AM [1900/2100];
2300 UT Saturday WTWW 9475 [suspended];
0230vUT Sunday WA0RCR 1860-AM [nominal 0315; as late as 0400];
1030 UT Sunday WRMI 9955 to SSE;
2000 UT Sunday IRRS 1323-Italy;
2230 UT Sunday SW Radio, Germany 3975;
2330 UT Sunday WRMI 7570 to NW & 7780 to SW;
0030 UT Monday WRMI 7780 to SW;
0930 UT Monday SW Radio, Germany 6160;
2030 UT Monday SW Radio, Germany 3975;
0330 UT Tuesday WRMI 7780 to SW;
1300 UT Tuesday WRMI 9955 to SSE [also web-, phonecast; jammed?];
1400 UT Tuesday WRMI 9955 to SSE [also web-, phonecast; jammed?];
2100 UT Tuesday IRRS 1323-Italy;
2330 UT Tuesday WRMI 9395 to NNW;
0030 UT Wednesday SW Radio, Germany 3975;
2030 UT Wednesday SW Radio, Germany 3975;
2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1730 UT Thursday SW Radio, Germany 3975 & 6160.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2287 monitoring confirmed Saturday March 22 at 1947 about 14 minutes into so started about 1933 UT on WA0RCR, 1860 AM, MO, VG into nearby SDR.

Also confirmed circa 0045 UT Sunday March 23 amid IRRS webstream only, still at same winter timing of 0030. By next week could be an hour earlier, or not quite into DST?

Also confirmed UT Sunday March 23 at 0324 about 14 minutes into at midpoint so the 0315v started early circa 0310 on WA0RCR, 1860 AM, JBA in noise level direct, but VG via nearby remote. Next:

2000 UT Sunday IRRS 1323-Italy;
2230 UT Sunday SW Radio, Germany 3975;
2330 UT Sunday WRMI 7570 to NW & 7780 to SW;
0030 UT Monday WRMI 7780 to SW;
0930 UT Monday SW Radio, Germany 6160;
2030 UT Monday SW Radio, Germany 3975;
0330 UT Tuesday WRMI 7780 to SW;
1300 UT Tuesday WRMI 9955 to SSE [also web-, phonecast; jammed?];
1400 UT Tuesday WRMI 9955 to SSE [also web-, phonecast; jammed?];
2100 UT Tuesday IRRS 1323-Italy;
2330 UT Tuesday WRMI 9395 to NNW;
0030 UT Wednesday SW Radio, Germany 3975;
2030 UT Wednesday SW Radio, Germany 3975;
2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1730 UT Thursday SW Radio, Germany 3975 & 6160.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2287 monitoring: confirmed Sunday March 23 at 2000 on IRRS SW via AM Italia, 1322.997+ kHz, S9+10 into UTwente across Europe. From next week: 1900.

Also confirmed Sunday March 23 at 2100 on WRN Europe webcast.

Also confirmed Sunday March 23 at 2230 on SW Radio, Germany, 3975.003-, S8/9+5 into UTwente. From next week: 2130 on 3975 AND 6160. See below.

Missed checking Sunday March 23 at 2330 on WRMIs 7570 & 7780; anyone hear them? Probably.

Confirmed UT Monday March 24 at 0030 on WRMI 7780, S9+20/40 into S Texas SDR.

Confirmed UT Monday March 24 at 0300 on Area 51 webcast, already started maybe a semiminute early. 5130- WBCQ is already playing music until 0303*

Also confirmed Monday March 24 at 1848 halfway thru the 1830v on SatZentrale webcast, so would have started about 1844. Next:

2030 UT Monday SW Radio, Germany 3975;
0330 UT Tuesday WRMI 7780 to SW;
1300 UT Tuesday WRMI 9955 to SSE [also web-, phonecast; jammed?];
1400 UT Tuesday WRMI 9955 to SSE [also web-, phonecast; jammed?];
2100 UT Tuesday IRRS 1323-Italy;
2330 UT Tuesday WRMI 9395 to NNW;
0030 UT Wednesday SW Radio, Germany 3975;
2030 UT Wednesday SW Radio, Germany 3975;
2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1730 UT Thursday SW Radio, Germany 3975 & 6160.
(Glenn Hauser, OK, WOR)

``ShortwaveRadio --- Hi Glenn, with every BC season, we are also changing from CET to summertime (CEST) on 30th March. So, all your WOR shows are minus one hour UTC. Plus, there will be the extra 6160 kHz outlet during European evenings as follows:

2230 UT Friday SW Radio, Germany 3975;
1430 UT Saturday SW Radio, Germany 6160;
1730 UT Saturday SW Radio, Germany 3975 & 6160;
2130 UT Sunday SW Radio, Germany 3975 & 6160;
0830 UT Monday SW Radio, Germany 6160;
1930 UT Monday SW Radio, Germany 3975 & 6160;
2330 UT Tuesday SW Radio, Germany 3975;
1930 UT Wednesday SW Radio, Germany 3975 & 6160;
1630 UT Thursday SW Radio, Germany [3975] & 6160.

The latter 3975 is cancelled. [last 3975 marked out]

A-25 general broadcast times:
6160 kHz: 0700 to 2200 UTC (09:00 to 00:00 CEST) - daily
3975 kHz: 1700 to 0000 UTC (19:00 to 02:00 CEST) - daily
Take care, Andy (Engineer - Shortwave Radio from Winsen on the river Aller in Germany)``
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2287 monitoring: confirmed Monday March 24 at 2050 the 2030 on SW Radio, Germany, 3975.003-, S8/9+5 but noisy into UTwente. From next week: 1930.

Also confirmed UT Tuesday March 25 at 0330 on WRMI 7780, S9+40/50 into S Texas SDR.

Also confirmed Tuesday March 25 at 1309 the 1300 on WRMI 9955, S8/9+5 direct.

Also confirmed Tuesday March 25 at 1411 the 1400 on WRMI 9955, S6/S8 direct. BTW, I have not perceived any jamming of 9955 for quite a while, even before R. Martí was deleted. Next:

2100 UT Tuesday IRRS 1323-Italy;
2330 UT Tuesday WRMI 9395 to NNW;
0030 UT Wednesday SW Radio, Germany 3975;

2030 UT Wednesday SW Radio, Germany 3975;
2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1730 UT Thursday SW Radio, Germany 3975 & 6160.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2287 monitoring: Confirmed Tuesday March 25 at 2100 on IRRS SW via AM Italia, 1322.997-, S9/+5 into UTwente across Europe. From next week: 2000

``Richard Lemke, St. Albert, Alberta, Canada, From the desk of Richard's listening Post, Radio: JRC NRD-535 HF (30 years of service), Antenna: random long wires in the trees. WRMI, USA, World of Radio #2287, ID not heard, 9395 kHz: QRN, 2330 (45433), below S 5 signal, very unsettled, S6, S7, voice heard at any ID pulling out difficult, barely copied at 2359, voice heard, March 25 UTC 2025 [Wed](Lemke, Richard -AB)``

Also confirmed Tuesday March 25 at 2330 on WRMI 9395, S9+20/22 into Maryland SDR.

Also confirmed UT Wednesday March 26 at 0030 on SW Radio, Germany, 3975.003- into UTwente. From next week: Tuesday 2330.

Also confirmed Wednesday March 26 at 2058 the 2030 on SW Radio, Germany, 3975.001-, S9/+10 into UTwente. From next week: at 1930 on 6160 and 3975.

Also confirmed Wednesday March 26 at 2100 on WBCQ 7490 -74 Hz = 7489.926, S9/+10 into Maryland SDR; again preceded by WBCQ ID and that preceded by TOMBS having to be faded down, instead of `Pirate Joe Extravagnzo` as still shown on sked. Next:

0130 UT Thursday WRMI 5010 to S {confirmed};
1730 UT Thursday SW Radio, Germany 3975 & 6160.

Financial support appreciated for our non-commercial public service program: thanks for a generous contribution marking Vernal Equinox, from Gerald T. Pollard, Raleigh NC, by check on a US bank to Glenn Hauser, P O Box 1684, Enid OK 73702, and says, ``Many thanks for your unique service to the world.``

One may also contribute not necessarily in US funds via PayPal to: woradio at yahoo.com (Glenn Hauser, OK, WOR)

** U S A. WTWW update from George McClintock, early UT March 26: solid state amplifier had a problem, putting the 9930/5920 TOMBS transmitter off for a couple days, now replaced and back on air; today already on 5920, changed early. The other transmitter may be off for up to two weeks more, awaiting a replacement tube, at a better price from China than rebuilding or a new one here. Tuning up on a low band but not on a higher band, like 5085 vs 9475 was the same problem it had when on Anguilla [I guess 6090 vs 11775]. By 2330 March 26, only 9930 is on the air (Glenn Hauser, OK, WOR)

** U S A. Pre- `AAAWWW` check of WBCQs, March 21 at 2350 into NH SDR: 3265, 5130, 6160 all OFF; 7490 -73 Hz = 7489.927 S9+10/20 with FKB. 9330 S9+10/20 WLCR in Portuguese. By *2355, 5130 -51 Hz = 5129.949 has cut on with IS & ID loop. At 0000 UT Sat Mar 22, 5130, 7490 and 9330 join for `William Tell Overture` theme, and his first overwords are ``Gee, look at all the changes ---``, so a new live show as likely when they bother to fire up 5130. 0003 immediately talking about trolling on eBay, somehow blaming Democrats. Soon rails against income tax, worst idea ever. 0014 W1NT SDR goes dark! Retune to Georgia, BCQ still on, 0019 laments TDS. 0030 first music in the hour. 0035 outro

as a radio song, invites email. Reads about ``our president vows to close down Voice of America``, one press report, source not cited but maybe BBC since mentions CBS as partner. 0038 then comments on the issue. Allan has mixed emotions: does not believe in state-run broadcasting, should be done by private individuals, even if government funded. If we had resources, we would put on ``VOA`` programming, perhaps in partnership with some other SW stations. But not one-sided, not anti-Trump. He doesn`t fully agree with the shutdown. Does not want to take over Greenville facility, hopes VOA can come back in some form.

They are both in Florida Studio 9, but we hardly hear from her except to make angry anti-Democratic interjexions. He admits to hogging the show and asks if she wants to hear some music; no definite reply heard, as he fiddles around but there is not enough time left to play anything more. Just received two copies of new Free Radio Weekly, like I did, so spends more time than usual reading station names, frequencies, a bit about program content and again disses SSB in favor of AM mode for pirates, imitating vocally how SSB sounds on AM reception; yes, but. At 0047 datestamp as 21 of March YOOLF 2025. 0053 some other email. At 0055, 7490 dumps off the air - it really is off, not just the SDR, so retune to 9330. 0059 prayer and runs slightly past 0100, when I find 5130 has changed to music, 6160 is JBA, 9330 back to WLCR, and 7490 is still off, of which he was not aware (Glenn Hauser, OK, WOR)

** U S A. 9330, March 22 at 2056, no signal from WLCR on WBCQ; what`s wrong? Also no signal UT March 23 at 0035 into UTwente, while other nominally weaker USigs quite audible at S7/S8 or S9 on 9265, 9395, 9930. Propagation has been degraded but surely not blacking out the path just a bit further north. 9330 still AWOL at 0356 direct check. Back on by 1608 check in English (Glenn Hauser, OK, WOR)

** U S A. 7490-, UT Sun March 23 at 0356, WBCQ S9+10/20, JP Ferraro is still on now if not on weekday afternoons; `Shortwave Saturday Night` at 0100-0400 (Glenn Hauser, OK, WOR)

** U S A. 9330, Mar 25 at 0633, NO signal again from WBCQ WLCR; what`s wrong? 9395 WRMI is there as usual. Still no 9330 circa 1550 and 1900, to UTwente or GA or MD SDRs (Glenn Hauser, OK, WOR)

** U S A. 9330, Mar 25 at 2328, WLCR on WBCQ is finally back on air, in Portuguese, VG into Maryland SDR (Glenn Hauser, OK, WOR)

** U S A. 5950, Sat Mar 22 at 0547, this WRMI is off, and still off at 0637; contrary to Mon Mar 17 when it was on with TOMBS at 0618, so was that an anomaly? (Glenn Hauser, OK, WOR)

** U S A. 7570, Sat March 22 at 0551 and still 0637, S9+25/35 of dead air from WRMI-5 instead of TOMBS, tsk2, while not dead - air that is, unlike BS, on 5850 WRMI-12 (Glenn Hauser, OK, WOR)

** U S A. 7780, UT Sunday March 23 at 0047, WRMI with `Frecuencia al Día` instead of `Wavescan` as on my last DX/SWL/MEDIA programs schedule, but now WRMI sked shows FAD at 0030, with WS before it at 0000. I was going to check what Jeff would say about the VOA/USAGM situation. O well, there are about four dozen airings a week, mostly on WRMI (Glenn Hauser, OK, WOR)

** U S A. 7570, UT Sun Mar 23 at 0357, WRMI in S9+20/30 of dead air except for a few extraneous noises. Top of WRMI skedgrid shows System G at this hour, but System G thinx it`s only on 9395. It`s System E that claims this time on 7570 for TOMBS; it figures. And 7570 *still* or again DA March 23 at 0703, S9+25 direct; while TOMBS is not dead on 7730, 7780, 5850, 5010?, WWCR 5890 (Glenn Hauser, OK, WOR)

** U S A. 7570, March 24 at 0638, dead air again like last two nights, instead of TOMBS, S9+25/30 from WRMI-5 (Glenn Hauser, OK, WOR)

** U S A [and non]. 15770, March 24 at 1455, no signal from WRMI-9 which is supposed to be on 24h, with SMTV during this hour; but there is a signal on 17790, before sked *1500; unseems English. That would be RRI in Romanian overlapping at 14-16 (Glenn Hauser, OK, WOR)

** U S A. 9395, UT Wed Mar 26 at 0030, one of dozens of `Wavescan` airings on WRMI. Mid-part 0042-0051 about USAGM/VOA situation as of March 19. Jeff quoted Kari Lake, NPR report, Jose Jacob obs of which broadcasts were off the air, also Thailand, Philippines; Vatican and Korea via Greenville; including some clips.

First item voiced by Ray Robinson referred to ``C M Stanbury [II] in the USA`` getting a QSL for Commando Solo long ago. I can`t be positive where he was on a particular date, but his QTH was Crystal Beach, Ontario, on Lake Erie west of Buffalo USA, south of Niagara Falls.

CMS2 hasn`t come up in a long time. Is not even in Wikipedia. He was a prolific DX author, such as for Electronix Illustrated, and here are some examples from 1969-70 of his own SW Newsletter, `published` by multiple? carbon copies of his dirty-keyed typewriter with numerous typos or strikeovers:
https://www.radioheritage.com/otsw/Newsletters/Short_Wave_Newsletter_Stanbury-II_1969-70.pdf

IIRC he was handicapped in some way. He`s hardly present on the internet, except for some more at that site. I don`t find an obit or even a bio (Glenn Hauser, OK, WOR)

** U S A. 7505, March 23 at 0356, WRNO is off already, or maybe not on at all tonight, not checked earlier (Glenn Hauser, OK, WOR)

** U S A. 600, March 26 at 0650 UT, again two Coast-to-Coast-AM affiliates *very* far out of synch, WMT IA as always on top. I finally time the difference as 57! seconds, which is far more than satellite delay or internet delay could account for. At 0700 I can`t catch any ID of the understation, just WMT, but probably KTBB TX, or maybe WREC TN; Fox ``news``, which is listed for all 3 of them (Glenn Hauser, OK, WOR)

** U S A. 660, March 21 at 0651 UT, `Coast to Coast AM`, // 600 WMT and many others. NRC AM Log shows only C2CAM on 660 is KEYZ, Williston ND, U4 5000/5000. Also logged Feb 16 at 0805 UT, q.v. (Glenn Hauser, OK, WOR)

** U S A. 770, March 23 at 0332 UT, dominant signal with net talk show, but break for a New Mexico ad, so KKOB is doing well for 12.5 kW ND, stronger than its northerly neighbors on 760 & 780 (Glenn Hauser, OK, WOR)

** U S A. 810 kHz, March 22 at 0606 and still 0640 UT, dead air from top signal, no doubt WHB Kansas City, depriving us of stupid sportstalk, tsk2! A musical station audible underneath. No 810.6v het this time (Glenn Hauser, OK, WOR)

** U S A. 900 kHz, March 23 at 0329 UT, station gives address as casscountyradio@gmail.com, music. Guess what, ``Cass County is the name of nine counties in the United States, each named for Michigan governor, senator and presidential candidate Lewis Cass`` -- IL, IN, IA, MI, MN, MO, NE, ND, TX. Who? When was that? {Democratic candidate for president, 1848.} But only one has a radio station by that slogan, per Google search, KALT, Atlanta TX, altho NRC AM Log says the 900

call there is KPYN and it`s silent! KALT is on FB however. Radio-locator knows of only KALT-FM 106.5 in Alturas CA! Guess what: FCC LMS agrees on the FM in CA, and also a DKALT in Atlanta TX whose license was canceled almost 20 years ago! So is 900 now KPYN as per NRC? Yes, in fact since 06/30/2000 per FCC LMS, and Cass County Radio does not expire until 2029y. And it`s not silent now. Only 33 watts at night! Don`t you believe it? 1000 day, U1. With so many stations, excuse me, cheating on their legal night power, makes it impossible to tally QRP DX catches or even records. If you ask the station and they even answer, are they going to admit they were on day power? Possibly, but if denied, can you believe that? (Glenn Hauser, OK, WOR)

** U S A. ``Re: the 1030 UNID in Spanish: I think you can safely rule out KCTA. I'm pretty sure KCTA only runs a half hour of Spanish programming each morning at 6am CT. It's the “Galvan Revival Church” program as listed at
https://kctaradio.com/blog/weekday-schedule/
I often hear that program from KCTA on my Border Inn DXpeditions, as KCTA signs on at (or before?) WBZ FCC sunrise time, which is 1100 UT / 6am CT in October when I make my recordings.

As for KCWJ, it might be worth comparing your signal to Radio Aliento del Cielo here: https://alientodelcielo.com/
KCWJ was reported as both Radio Aliento del Cielo (//KKLO-1410 and a 92.7 FM in Lenexa) and Radio Vida around the same time a few years ago. I wasn't sure which report was correct, and I haven't heard KCWJ much since. HTH, Tim Hall``

Mauno Ritola via abdx.org: ``MW list has Aliento del Cielo Radio for KCWJ: https://alientodelcielo.com/
73, Mauno``

Before seeing those, I listened again to 1030, March 20 straight thru from 0510 to 0620 UT: Still, no announcements whatever, just praise music in Spanish; could have inserted ToH ID at 0603 between songs or 0608; does FCC ever cite stations for such repeated minor? infraxions? I also checked the Radio Vida webstream which radio-locator.com thinx applies to KCWJ, but it was talk part of the time, and different music part of the time. So obviously KCWJ is not (any longer?) with Radio Vida, explaining my obs. I also DFed it as NE/SW which fits well for Kansas City area. Anyhow the music is nice and harmonious; fortunately I am much more fluent in Spanish spoken than sung, so could enjoy the music pro arte without being distracted by the no doubt nonsensical lyrix (Glenn Hauser, OK, WOR)

** U S A. 1150 kHz, C2CAM on 1150 frequently has a very quick echo, close to a reverb. Main one is KSAL Salina KS, but what else? Too many others in NRC AM Log: WNDB FL, WJBO LA, KRMS MO, WIMA OH, KAGO OR, KQQQ WA, WHBY WI, CKFR BC. Most likely WJBO, 15/5 kW but U4 direxional E/W, or closest, KRMS MO, U1 840/55. It`s easy to DX C2CAM all over the dial, especially during a caller with distinctive voice, or music bit; but usually far out of synch with each other (Glenn Hauser, OK, March 21, WOR) See 600

** U S A. 1270, March 23 at 0338 UT, sportstalk in Spanish, carrier cutting out irregularly - I think, rather than just the modulation. Only fit is KFLC Benbrook [The Metroplex] TX, on TUDN network, U4 50/5 kW and heard before (Glenn Hauser, OK, WOR)

** U S A. 1280, March 20 at 0629 UT, ``Newsradio KYRO,`` back to `Red Eye Radio`. That`s U1 660/45 watts at Troy MO, address in St Louis. Bet they were on huge day instead of night power. Radio-locator shows address in Moscow Mills, which is just SE of Troy and site is further NW of Troy halfway to Silex; also near Wentzville, home of WA0RCR, all

of which NW of St Louis (Glenn Hauser, OK, WOR)

** U S A. 1510 kHz, March 20 at 0631 UT, WLAC Nashville still getting equal-level QRM from KCTE, and now also logged elsewhere: ``Terry L Krueger via groups.io, Boggy, Florida Occidental, IC-R75, NRD-535, ICF-7600GR, Tescun PL-360, active loop, random fence-stapled wire, misc. junk: 1510, MISSOURI, KCTE, Independence, 1035, 13 MAR 2025. Presumed the one, daytimer cheating at 10 kW with ESPN spew, parallel delayed station stream. Poor with WLAC barely nulled. Thanks Glenn Hauser tip. First time log`` (Glenn Hauser, OK, WOR)

** U S A. 1530, March 23 at 0340, Mexmx from N/S, vs WCKY E/W. Probably KZNX Creedmoor TX as logged and discussed at length before (Glenn Hauser, OK, WOR)

** VANUATU. 7260, March 22 at 0548, JBA carrier, presumed R. Vanuatu; would be interesting to find how early it can fade in direct. Today`s sunset at Port Vila would be 0655 UT; at latitude -17.72 south, during the year it varies litte more than an hour between 0620 and 0728 UT per gaisma.com (Glenn Hauser, OK, WOR)

** VATICAN [non non]. 7305, March 22 at 0135, I run TDOA on VR Spanish which used to be Greenville, same trio as for 11880 Korea, q.v. This promptly leads to 52.60, -30.40 which is in the middle of the North Atlantic between Ireland and Labrador. Yeah, right. We are already quite sure this be direct from SMG (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 344 kHz, March 24 at 0628 UT, JBA carrier should be strong enough to hear some MCW, but nothing. Maybe my closest, heard before, JL in Joplin MO (Glenn Hauser, OK, WOR)

UNIDENTIFIED [and non]. 600, Mar 25 at 0643 UT, WMT Cedar Rapids IA dominates as usual with C2CAM, but unusually there is QRM from another C2CAM station *way* out of synch by many seconds. Possibilities in NRC AM Log as of last August: KOGO CA, KCOL CO, WREC TN, KTBB TX. I think we can rule out KOGO: besides distance, null thisaway. KCOL also null thisaway. KTBB does have a lobe thisaway, and WREC is direxional SW. Assuming everyone in spec, that leaves KTBB Tyler TX, which is also closest (Glenn Hauser, OK, WOR) See also USA: 600 above

UNIDENTIFIED. 810.59, March 20 at 0640 UT, JBA carrier again hetting 810.00 WHB. What`s it? (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 1260, March 23 at 0335 UT, Spanish music from N/S, while English from E/W. Probably one of the two SS Texans, rather than weaker or further possibilities: KTAE Elgin TX U1 1000/144, or KLDS Falfurrias TX U1 500/330 religious; but there are also four Mexicans led by XEL in CDMX (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 1650 kHz, March 20 at 0633 UT, tone mixing with other stations, about 320 Hz above and below, and a much weaker JBA 1 kHz tone. Suspect KSVE El Paso which was running tone overnight for months and months last year (Glenn Hauser, OK, WOR)

UNIDENTIFIED [and non]. 1650 kHz, March 21 at 0618 UT, continuous tone again of about 320 Hz, mainly QRMing S Asian music, which has to be CINA, Mississagua = Toronto; tone suspect KSVE El Paso TX as before. Suspect CINA U1 5000/680 be on day power as had not heard it until recently; KSVE also with weird power levels, U1 8500/850 watts. All this superior to my closer 1650s, KCNZ IA and KBJD CO, both ND = U1 1000 W at night (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 1650 kHz, March 24 at 0652, again tone of about 320 Hz against 1650 stations, probably KSVE El Paso. A local listener could confirm that (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 1650 kHz, Mar 25 at 0637 UT, still tone of about 320 Hz, probably from KSVE El Paso (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 7656.0, March 24 at 0639, open carrier except for JBA clickery roughly twice per second, but seemed to be separate even weaker clix between them, S9+10/15 vs HSNL, which also difficultizes determining extent of the clickspan, roughly 7642/7670 = +/- 14 kHz. Yet another one ending in -6. What is this? In 2020 & 2022, 7656 was among a long list of Civil Air Patrol frequencies, coincidental? (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 9141-9200 approx., March 21 at 0641 UT, 59 kHz wideband multi-tone, multi-carriers beating, peaking circa 9178, S9+20, same thing as heard later at 15866-15913, q.v.. What is this? (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 9162-9219, March 24 at 0644, multi-carrier, multi-tones beating over this wide 57-kHz range, peaking S9+10 amid circa 9188. What is this? (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 9162-9223~, March 26 at 0608, multi-carrier, multi-tones beating over this wide 61-kHz range, gradually tapering off at the edges and peaking at S9+25 circa 9214. What is this? Previous log: 9162-9219, March 24 at 0644 (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 9236.0, March 22 at 0554, open carrier except for clix every 3 seconds, those detectable out to between 9221/9251, i.e. plus/minus 15 kHz. Same frequency as before, one of several ending in -6, but the clickery rate varies from one log to another. What is this, and what is it accomplishing with the clickery? (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 10024 USB, March 26 at 0606, JBA 2-way ATC contact between plane and ground. Klingenfuß shows numerous cities in South & Central America. Sounds like English, the lingua franca of ATC even in Latin America (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 15866-15913 approx., March 21 circa 1430 UT, 47 kHz wideband multi-tone, multi-carriers beating, peaking circa 15908, S9+10, same thing as heard earlier at 9141-9200, q.v. What is this? (Glenn Hauser, OK, WOR)
